

I am a loyal subscriber to satellite radio. Specifically, XM radio. I love the service and the variety. It is something I will never buy a car without. It is a wonderful service. As an individual with a grueling commute and a consumer as well, I receive something with satellite radio that can't be replaced. My sense is, then, the National Association of Broadcasters is feeling threatened. Instead of trying to step up to the competitive challenge, they want to hide behind regulation. I pay for this service. I do not want the NAB interfering with what I hear on this service. Please reject the NAB's petition 04-160.

Thank you,

Scott H. Parker
